American POTATO JOURNAL

Official Organ of the Potato Association of America

VOLUME 31

JANUARY - DECEMBER, 1954

EDITORS

WM. H. MARTIN

J. C. CAMPBELL E. S. CLARK

RUTGERS UNIVERSITY, NEW BRUNSWICK, NEW JERSEY

OFFICERS

ARTHUR HAWKINS, *President*

CECIL FRUTCHEY, *Vice President*

R. W. HOUGAS, *Secretary*

JOHN C. CAMPBELL, *Treasurer*

J. H. MUNCIE, *Past President* (deceased)

DIRECTORS

PAUL EASTMAN J. B. ADAMS

WM. G. HOYMAN

SUSTAINING MEMBERS

STARKS FARMS INC. ..... Route 3, Rhinelander, Wisconsin

BACON BROTHERS ..... 1425 So. Racine Ave., Chicago 8, Illinois

L. L. OLDS SEED CO. ..... Madison, Wisconsin

FRANK L. CLARK, Founder — Clark Seed Farms ..... Richford, New York

RED DOT FOODS, INC. ..... Madison, Wisconsin

INTERNATIONAL HARVESTER CO. ..... Chicago, Illinois

ROHM & HAAS COMPANY ..... Philadelphia, Pennsylvania

CALUMET DIVISION, CALUMET & HECLA, INC. ..... 1 Calumet Ave., Calumet, Michigan

WISE POTATO CHIP CO. ..... Berwick, Pennsylvania

JOHN BEAN DIVISION, FOOD MACHINERY CORP. ..... Lansing 4, Michigan

S. KENNEDY & SONS, Growers and Shippers of Potatoes and Onions ..Clear Lake, Iowa

MATHIESON CHEMICAL CORP. ..... Mathieson Bldg., Baltimore, 3, Maryland

AMERICAN AGRICULTURAL CHEMICAL CO. ..... Carteret, New Jersey

GREEN CROSS INSECTICIDES ..... Montreal, Ottawa, Canada

LOCKWOOD GRADER CORP. ..... Gering, Nebraska

INDEX TO VOLUME 31

Author and Title Index

Akeley, R. V. and R. W. Buck. Breeding for resistance to late blight. 165-172.
————, see Parker, M. M.
————, see Peterson, C. E.
————, see Stevenson, F. J.
Ayers, G. W. and D. B. Robinson. An inoculation technique for the study of dry rot of potatoes. 278-281.
Beresford, B. C., see Krantz, F. A.
Black, W. Late blight resistance work in Scotland. 93-100.
Bonde, Reiner and Paulo de Souza. Studies on the control of potato bacterial seed-piece decay and blackleg with antibiotics. 311-316.
Bradley, George A. and A. J. Pratt. The response of potatoes to irrigation at different levels of available moisture. 305-310.
Brasher, E. P., see Stevenson, F. J.
Buck, R. W., see Akeley, R. V.
Callbeck, L. C. A progress report on the effect of zinc as a constituent of potato fungicides. 341-348.
Campbell, John C., Book review — The potato in health and disease, by T. Whitehead, T. P. McIntosh and W. M. Findlay. 384.
————, Book review — Soil, by G. V. Jacks. 420.
Castronova, Alfonso. Studies on the inheritance of resistance to *Phytophthora infestans* in potatoes. 397-403.
Cervantes, Javier, see Niederhauser, John S.
Choudhuri, H. C. Spray tests for control of potato blight in the hills of West Bengal. 263-272.
Cooper, D. C., G. W. Stokes and G. H. Rieman. Periderm development of the potato tuber and its relationship to scab resistance. 58-66.
————, see Rieman, G. H.
Davis, J. F., see Lucas, R. E.
deSouza, Paulo, see Bonde, Reiner.
Edmundson, W. C., see Erwin, A. T.
Eide, C. J., see Krantz, F. A.
Ellis, N. K., see Peterson, C. E.
Ellison, J. Howard and Walter C. Jacob. Further studies concerning the influence of irrigation on the nitrogen, phosphorus and potash requirements of six potato varieties. 141-151.
Erwin, A. T., C. E. Peterson, L. A. Schaal, and W. C. Edmundson. Osage: a new baking-type potato variety resistant to common scab. 299-304.
Findlen, Herbert, see Lutz, J. M.
Gammon, Nathan, Jr., see Volk, G. M.
Griffith, C. H., see Krantz, F. A.
Hall, Carl W. Combination potato grader-polisher. 152-154.
Hardenburg, Robert E. Comparison of polyethylene with various other 10-pound consumer bags for Sebago, Katahdin, and Green Mountain potatoes. 29-39.
Hawkins, Arthur. Time, method of application and placement of fertilizer for efficient production of potatoes in New England. 106-113.
Haynes, F. L. Potato embryo culture. 282-288.
Herb, S. F., see Highlands, M. E.
Highlands, M. E., J. J. Licciardello and S. F. Herb. Observations on lipid constituents of white potatoes. 353-357.

Whiteman, T. M. and J. M. Lutz. Sunken scald spot field injury evident in stored potatoes. 43-49.
Wright, N. S. The witches broom virus disease of potatoes. 159-164.

Subject Index

Antibiotics for control of potato bacterial seed-piece decay and blackleg, 311-316.
Aster yellows, (purple top), 119-128.
Bacterial decay, see Antibiotics
Blackleg, see Antibiotics
Blight, late, breeding for resistance to, 165-171.
committee report, 240-241.
in Mexico, 233-237.
international system of designating genotypes and races, 238-239.
resistance work in Scotland, 93-100.
resistance, see Cherokee, Delus and Pungo
sprays for control in West Bengal, 263-272.
testing for resistance in Canada, 129-140.
see *Phytophthora infestans*
Branch-trace, see Necrosis
California, see Seed-piece treatment
Chelating agents, see Potato quality
Cherokee, 53-57.
Conference of research men in Wisconsin, 183-186.
Consumer bags, see Polyethylene
Crop situation in 1954 and utilization of previous crops, 289-293.
Cytology and Genetics of the potato (Book review), 50.
Darkening, see Potato quality
Delus, 410-413.
Dry rot, see Inoculation
Embryo culture, 282-288.
Environment, see Utilization
Fasciation, see Root fasciation.
Fertilizer in New England, time, method of application and placement, 106-113.
Field sprouted potatoes, see Storage
Florida, see Potato production
Frozen French fries, see Grade standards
Fungicides, see zinc
Genetics, see Cytology
Golden nematode in the United States, 387-396.
Grade standards for frozen French fries, 384.
Grader-polisher, 152-153.

Hybrids, potato varieties derived from, 1-11.
Immersion in sea water, effect on sprouting, 317-321.
Improvement, see Somatic mutations
Inheritance of resistance, see *Phytophthora infestans*
Inoculation technique for the study of dry rot, 278-281.
Interveinal mosaic, 101-105.
Irrigation at different levels of available moisture, 305-310.
influence on nitrogen, phosphorus and potash requirements, 141-151.
Late blight, see Blight
Leafroll, see Necrosis
Lipid constituents of white potatoes, 353-357.
Loans for water supplies, irrigation and soil conservation, 382-383.
Machinery, see Potato handling
Marketing in Europe, 187-191.
orders, 222-230.
see Selective and non selective buying
see Polyethylene plastics
Nebraska, see Tubers
Necrosis, branch-trace, symptom of leafroll, 12-18.
Nitrogen placement, see Fertilizer
requirements effected by irrigation, see Irrigation
sources, see Production
North Dakota potato tour, 294.
Nutrition variation effects on roots, see Unilateral effects
Organic soils, see Potassium
Osage, 299-304.
Osseo, 273-277.
Periderm development, relation to scab, 58-66.
Phosphate-potash ratios, see Potassium
Phosphorus placement, see Fertilizer
requirements effected by irrigation, see Irrigation
Physiological ontogeny, effect of weed competition and root pruning, 178-182.
Phytophthora infestans, inheritance of resistance to, 397-403.
also see Blight
Polyethylene, comparison with other bags, 29-39.
plastics, help sell potatoes, 196.
Potassium carriers and phosphate-potash ratios ,effect on potato yield and quality, 349-352.
effect on growth, see Unilateral effects
requirements affected by irrigation, see Irrigation
Potato Association of America, abstracts of papers presented at annual meeting, 366-376.
annual meeting announcement, 114, 117, 157, 231.
annual meeting program, 260-262.
committees, 51.
financial statement, 52.
late blight committee minutes, 240.
minutes of annual meetings, 192-195.
Potato handling machinery, 252-259.
Potato quality, effect of foliar applications of sequestering and chelating agents on after-cooking darkening, 404-409.
Potato must be rehabilitated, 414-420.
Potato, in health and disease (Book review). 384.
Processing, see Southern grown varieties.
Production in Florida, 83-92.
Pungo, 322-326.
Purple-top, see Aster yellows
Quality, see Potassium
see Potato
see Utilization
see Where do we go from here?
Red La Soda, 40-42.
Root fasciation, 154-156.
Root pruning, see Physiological ontogeny.
Scab resistance, see Cherokee

see Osage
see Periderm development
Sea water, see Immersion
Seed-piece decay control, see Antibiotics
size, see Tubers
treatment in Kern County California, 245-251.
Selective and non-selective buying, 172-177.
Sequestering agents, see Potato quality
Soil acidity, see Production
Soil. (Book review), 420.
Somatic mutations, a means of potato improvement, 358-359.
Southern grown varieties, suitability for processing, 360-365.
Spray tests, see Blight
Sprouting, see Immersion
Storage behavior of field sprouted potatoes, 218-221.
Sunken scald spot in stored potatoes, 43-50.
Tobacco, White Burley, see Virus Y
Tubers, effect of size on yield in Nebraska, 19-27.
Unilateral effects caused by varied nutrition of roots, 242-244.
Utilization conference, 381.
in relation to variety and environment, 327-340.
see Crop situation
Varieties, see Cherokee
see Delus
see Hybrids,
see Osage
see Osseo
see Pungo
see Red La Soda
see Southern grown
see Utilization
Virginia, see Pungo
Virus infection, see Necrosis
virus A, 67-72.
virus X free potatoes, maintenance of, 73-82.
virus X resistance in potato, 199-212.
virus Y inducing necrotic spots on leaves of tobacco, 213-217.
witches' broom, 159-164.
see Aster yellows
Weed competition, see Physiological ontogeny
West Bengal, see Blight
Where do we go from here?, 377-381
Wisconsin, see Conference
Witches' broom, see Virus
Zinc, effect as a constituent of potato fungicides, 341-348.
